

GP-SDM 230 Modbus

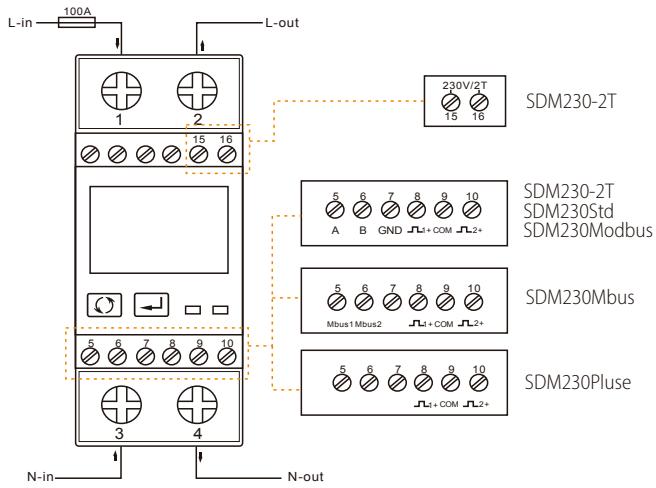

Single phase multi-function energy meter

Introduction

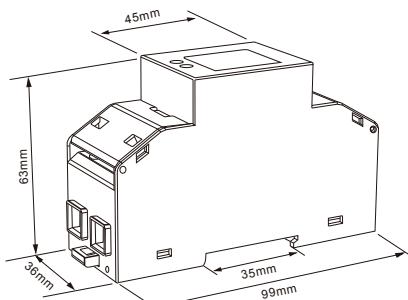

GP-SDM230 series is an advanced digital single phase multi-function energy meter, which measures up to 100A direct load. The unit measures active energy, reactive energy, current, voltage, power, power factor, frequency, demand, etc. Bi-directional measurement makes this unit an ideal choice for Solar PV measurement. A remote communication port is provided, RS485 Modbus RTU or M-bus EN13757-3 and Communication parameters are password protected in setup mode. User can check data and set up the meter via the buttons on the front panel. GP-SDM230-2T can measure energy from two different power supplies
