

# MISSION

ENERTEC is a company that works toward the management of energy efficiency systems, developing sustainable projects focused on reducing consumption costs and promoting the use of this resource in an efficient, clean and friendly way with the environment.

Through high-level technical studies, highly qualified staff, innovative and high-quality products. We put at the service of the country the best of the planet for its development of energy, technology and telecommunications infrastructure.

# VISION

In 2025 ENERTEC will have a presence in the Latin American energy market, expanding its operating base with the support of its strategic allies, increasing its participation in the distribution, commercialization, and generation of energy efficiency systems.

Promoting the care of the environment, the improvement of the quality of life and contributing to the local and regional development of Latin America, ENERTEC today builds the energy of tomorrow.
